Pacific Walrus and climate change: observations and predictions

James G. MacCracken

Ecology and Evolution 2:2072–2090

On page 2087, we missed adding a disclosure statement in the Acknowledgments that “The findings and conclusions in this article are those of the authors and do not necessarily represent the views of the U.S. Fish and Wildlife Service.” We regret this oversight.

The Acknowledgments paragraph should read like the following:

Acknowledgments

E. Lance, A. Matz, M. M. Myers, and J. W. Wilder provided reviews of a variety of issues associated with climate change that could affect Pacific walrus. D. C.

Douglas provided data on sea-ice extent and ice-free months for Table 2. J. Garlich-Miller and J. Snyder contributed substantially to this effort. The findings and conclusions in this article are those of the authors and do not necessarily represent the views of the U.S. Fish and Wildlife Service.
